## Primary Care at Home

### *Reviving the house call...*

Do you have difficulty getting out to the doctor's office? Our in-home care offers a host of services in the comfort of your own home.

- Primary Care Physician and Nurse Practitioners
- Mobile x-ray, EKG and laboratory services for the homebound
- Access to remote patient monitoring to alert your care team of a new or changing symptom
- Readily available Telehealth visits
- Preventative therapies and health education
- In-home counseling and cognitive health assessments
- After hours urgent response by medical staff (24/7 program)
- Pharmacist medication review

## What to Expect From Primary Care at Home Services

- Our providers visit patients in their homes, where health begins, and have the time needed to create a personalized care plan to address chronic health conditions.
- Home based primary care is associated with decreased hospitalizations and emergency room visits.
- Remote patient monitoring (RPM) offers an early warning system to alert the Primary Care at Home services team when fragile and chronic patients require attention.
